

CHRISTMAS COTTAGE GINGERBREAD KIT

Cute Cakes
BAKERY & CAFE

1.) Carefully separate all of your gingerbread pieces by gently twisting them apart. Pulling apart could cause breakage of your pieces. Gently knead the frosting bag to warm and blend the royal frosting.

2.) Your Gingerbread has two sides: a stamped one and a rough one! You choose what you want the outside of your house to look like and keep it the same during your construction.

3.) Using a sharp pair of scissors, snip off the tip of the frosting bag to make an opening between 1/8" and 1/4" diameter. (Smaller openings will allow you to pipe designs during decorating, but larger openings are easier to squeeze the heavy beads of frosting needed for strong construction.)

4.) Squeeze a HEAVY bead of frosting to the bottom edge of your house back. Lay aside.

5.) Squeeze a HEAVY bead of frosting to one side edge and along the bottom edge of one of your side pieces. Place the back and side together and attach to your board. When positioning your house, make sure to leave room either in your front, side, or back yard for your Christmas Tree!

6.) Repeat for the 2nd side and attach to your board and the house back.

7.) Squeeze a heavy bead of frosting to the bottom edge of your house front, and along the inside long side edges.

8.) Position house front, aligning all edges and gently squeeze to set.

9.) Squeeze a heavy bead of frosting to all top edges of your house including sides and roof edges.

10.) Squeeze a heavy bead of frosting to the INSIDE long edge of one of the roof pieces. (Roof Piece #1)

11.) Attach the 2nd roof piece (Roof Piece #2) to Roof Piece #1 along the bead of frosting and place both pieces on top of the house. Using one hand, gently pinch the two roof pieces and hold for about a minute to set the frosting.

12.) Now it's Time To Decorate! Use the remainder of the white frosting to attach your candy pieces to your house or pipe festive designs. Have Fun!
